

MICRO-NEEDLING

This minimally invasive skin rejuvenation procedure is designed to target concerns of fine lines, acne scars, hyperpigmentation and the improvement of skin's tone and texture. It is a form of collagen induction therapy meaning it stimulates collagen production to improve the plumpness of the skin as well as to promote skin healing.

How does Micro-Needling work?

Micro-needling creates a controlled injury underneath the skin's surface, thereby inducing the body to respond through the formation of new tissue layers of elastin and collagen fibres. It also introduces new capillaries for an improved blood supply. The skin plumps and thickens in response to this ultimately reducing the appearance of scars, fine lines and other skin texture concerns.

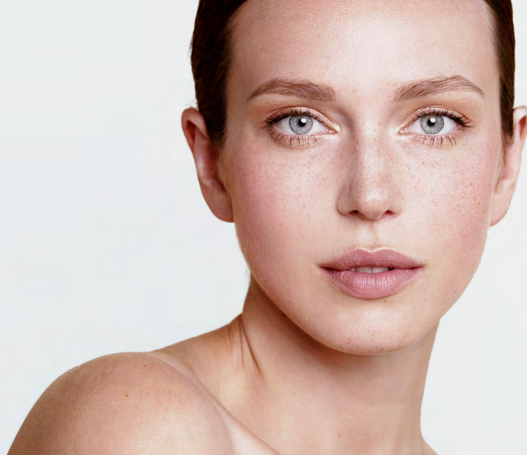

The Micro-Needling Process

The skin is thoroughly cleansed and topical numbing cream is applied for 30 minutes prior to treatment. The treatment involves tiny micro-point needles closely-spaced gliding back and forth across the affected skin areas creating a wound to stimulate collagen and skin healing.

Nano Needling Add On	15min	R380
Micro-Needling (Face Only)	75min	R1 540
Micro-Needling (Face & Neck)	90min	R1 980
Micro-Needling (Face, Neck & Décolleté)	120min	R2 310

**micro needling treatments include 30min numbing time*

Micro-Needling Treatment Facts

75 - 120 min
Including numbing time

Recovery Time

5 - 7 days

Return to Work

Next day

Duration of Results

24 - 30 months

Anaesthetic

Topical (optional)
30min prior to treatment

Treatments

Four

Optiphi Essential Skin Supplements

R280 each

Each individual Skin Supplement boasts targeted active ingredients formulated to synergistically treat a specific concern on the skin and scalp.

- **Gallic Acid** - A unique combination of gallic acid and niacinamide (Vit B5), in high concentrations, aim to address discolouration concerns. This Skin Supplement encourages the inhibition of the skin's pigment-producing processes, and in turn calms the skin by reducing the activation of pigment formation and redness. The Gallic Acid Skin Supplement provides great support for all skin discolouration and pigmentation concerns.
- **Fractionated HA** - Hosting a blend of 3 different fractions (sizes) of hyaluronic acid. The high fraction HA (larger size) aims to hydrate and soothe, while the middle fraction (medium size) plumps and improves wrinkling over 6 hours. The lower fraction (smallest size) targets the repair, recovery and reduction of redness. The Fractionated HA Skin Supplement is ideal for skins prone to breakouts and spots or as a booster treatment for ageing skin.
- **Vitamin B Complex** - Designed with an intelligent blend of 10% Vitamin B3 to assist in barrier recovery, improve even skin tone, contribute to stimulating collagen production; and 5% Vitamin B5 to soothe, hydrate and support wound healing properties of the skin. The Vitamin B Complex Skin Supplement is great to encourage the improvement of barrier-impaired skin, as well as skin breakouts and spots.
